

Research into Johann Diedrick

Johann Diedrick is an artist, engineer, and musician who makes installations, performances, and sculptures to encounter the world through our ears. He surfaces vibratory histories of past interactions inscribed in material and embedded in space, peeling back sonic layers to reveal hidden memories and untold stories. He shares his tools and techniques through listening tours, workshops, and open-source hardware/software. He is the founder of A Quiet Life, a sonic engineering and research studio that designs and builds audio-related software and hardware products for revealing possibilities off the grid through sonic encounters. He is a 2021 Mozilla Creative Media Award recipient, a member of NEW INC, and an adjunct professor at NYU's ITP program.
